

P50 WP

The **P50** water suction cleaner is the ideal machine for a tough job. The water suction cleaner is used not only for ponds and pools, but also for craftsmen with cleaning jobs after floods.

That is why this cleaner has a shock-proof plastic drum and frame. A continuous water draining is possible due to the integrated drain water pump which is implemented directly into the vacuum.

Moreover, the built-in filter net is easy to empty thanks to the solid zip. The filter itself protects the pump against all debris.

PRODUCT SPECIFICATIONS

- Functioning : The water is vacuumed into the container. The integrated drain water pump discharges the water continuously
- Discharge height 9m
- Wet floor tool can be used in forward as well as backward moving while the vacuum is moving
- Powerfull drain water pump can run dry for 100 working hours
- C-Hose connector for the drain water hose, fits standard C-hoses e.g. fire brigades

STANDARD EQUIPMENT

Code	Item description
3.8023.102015	Wet floor nozzle (360 mm)
3.8023.110052	Pond nozzle
3.8023.110048	Filter net
3.8023.110049	7 m flexible hose
3.8023.110053	10 m drain water hose
3.8023.110047	4 part floating plastic suction pipe (4x 0,5 m)
3.8023.102016	Crevice nozzle for P50 WP
3.8023.102017	Furniture brush, round for P50 WP
